

BRAUN SPACE 3-MOUNT

Description

The Braun Space Mount is a highly innovative product designed for use in a variety of applications, including ceiling and stretcher table connections. The mount features a medwall connection with SPAES' Top Claw technology, a locking indicator, and a quick-release mechanism that allows for easy removal of the device.

In addition, the mount includes handle protection for the device stamp, ensuring that the device is secure and protected during use. The modular construction allows for the attachment of up to three mounts, providing users with maximum flexibility and versatility.

The mount enables continuous patient care during flights, ensuring uninterrupted infusion therapy in life-threatening situations.

Ideal for intensive emergency operations, where every second counts.

Benefits

- Complies with the highest aviation safety standards.
- Ensures secure fastening of B. Braun Space infusion pumps, even under strong vibration and acceleration.
- Optimizes space in the helicopter without obstructing access to the devices.
- Quickly and easily mounted on standard helicopter connection systems.
- Developed for safe use under changing environmental conditions during flight.

Details

- Dimensions in mm: 400x250x200
- Weight: 2,3kg
- Material: Aluminum 2024
- Optional: ceiling and stretcher table connections

Our products - your benefit

You require the installation of new mission equipment or need medical systems for your new mission profile - we have the right solution for your demands.

By cooperating with renowned partners from the aviation industry and companies in air rescue, we design and manufacture tailor-made products for your applications. Whether fiber composite, metal or avionics, we implement your requirements from the idea to the finished product for you in our EASA Part 21J Design Organization and Part 21G Production Organization.

We are specialized in the following areas:

- Mission Equipment
- Medical Systems
- Engineering
- Manufacturing
