

MEDICAL CABIN H155

Description

Innovative features and maximum flexibility to meet the demands of modern emergency services:

- **Variable Stretcher:** The stretcher, aligned in the direction of flight and rotatable, is ideal for accommodating Stryker stretchers and provides comfort for patient care.
- **Spacious Compartment:** A large Medical Cabin compartment is located in the rear of the helicopter for the secure storage of various medical devices and supplies. The integrated power supply (230V, 28V, and 12V) ensures that all equipment is always ready for use.
- **Oxygen Bottle Compartment:** A specially designed compartment ensures that oxygen bottles are stored securely and within easy reach.
- **Seating for up to 4 Passengers:** The cabin is designed for a total of four seats that can be easily installed and removed. One of the seats is foldable to create additional space.
- **Ceiling Mount:** The ceiling mount allows for the installation of medical devices, ensuring that the cabin is optimally equipped for emergencies.
- **Side Wall Mounting Options:** The side walls offer horizontal and vertical mounting options for medical devices, providing additional flexibility in equipment arrangement.

3-D Rendering Medical Cabin

Details

Available for H155 and for other types.

Our products - your benefit

You require the installation of new mission equipment or need medical systems for your new mission profile - we have the right solution for your demands.

By cooperating with renowned partners from the aviation industry and companies in air rescue, we design and manufacture tailor-made products for your applications. Whether fiber composite, metal or avionics, we implement your requirements from the idea to the finished product for you in our EASA Part 21J Design Organization and Part 21G Production Organization.

We are specialized in the following areas:

- Mission Equipment
- Medical Systems
- Engineering
- Manufacturing
